PROFILE SUMMARY

Computer Science undergraduate pursuing Honors in Data Science with strong analytical problem-solving, quantitative aptitude, and experience building data-driven systems. Interested in solving complex analytical problems in high-performance environments.

EDUCATION

Indian Institute of Information Technology, Pune	Aug 2023 – Present
Bachelor of Technology in Computer Science	CGPA: 8.26
Honors in Data Science	CGPA: 9.5
City Central High School (CBSE)	Samastipur, Bihar
Secondary School (2020): 93.4% Senior Secondary (2022): 92.4%	

SKILLS

Languages: C, C++, Java, Python, SQL
Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Probability, Statistics
Backend: Spring, Spring MVC, Spring Boot, REST APIs
AI/ML: GenAI, RAG, LLM Integration
Tools: Git, Postman, Render, IntelliJ IDEA, VS Code
Soft Skills: Team Management, Public Speaking

ACHIEVEMENTS & CERTIFICATIONS

- Solved **600+** Data Structures & Algorithms problems on **GeeksforGeeks**, achieving a coding score of **2000+**.
- Maintained a **400+ day** streak in **GeeksforGeeks Problem of the Day (POTD)** challenge.
- **Finalist at TrustAI Ideathon 2026**, ranked among the top 5 teams nationally for work on safe and trusted AI.
- Adobe India Hackathon – Round 1 (Participation), Adobe (2025).
- Google Solution Challenge (Participant), GDG on Campus & Hack2Skill (2025).

PROJECTS

Smart Library Management System

Tech Stack: Java, Spring Boot, React.js, MySQL, REST APIs, GenAI (Gemini, Pinecone)

- Developed a role-based library system with secure access for Admin, Librarian, and Users.
- Implemented a content-based recommendation system using cosine similarity on user borrowing history.
- Integrated embedding-based semantic search and vector retrieval for book summarization and query handling.
- Managed complete book lifecycle (issuing, returns, renewals, fine tracking) via REST APIs, ensuring data consistency and efficient operations.

GUARDIAN – AI-Based Real-Time Crime Intelligence System

Tech Stack: Python, FastAPI, Selenium, Gemini LLM, PostgreSQL, MapMyIndia (Mappls), OpenStreetMap

- Built an AI-driven pipeline to extract and structure crime data from unstructured FIR PDF documents.
- Automated FIR scraping and OCR-based information extraction using Selenium and Gemini LLMs.
- Implemented geocoding and interactive crime map visualization to identify real-time crime hotspots.
- Designed a scalable backend using FastAPI and PostgreSQL for efficient FIR storage and retrieval.

Personal Finance Tracker

Tech Stack: Spring Boot, SQL, JSP, JWT, Render

- Designed and tested REST APIs to manage user income, expenses, and budgets with JWT-based authentication.
- Implemented role-based access control ensuring secure handling of financial data.
- Designed normalized database schema and optimized SQL queries for efficient data retrieval.
- Built endpoints for financial analytics including monthly summaries and category-wise insights.
- Deployed full-stack application on Render, enabling live API access and handling production-level request routing.

ACTIVITIES & INTERESTS

- **Head, QuantNum – Mathematics Club, IIIT Pune (2025 – Present):** Leading quantitative problem-solving workshops, mathematical competitions, and analytical reasoning sessions.
- **Core Vocalist, Saaz – Music Club, IIIT Pune (2023 – Present):** Lead vocalist in college events; represented IIIT Pune in inter-college competitions.
